Rickenbacker Causeway Shoreline and Roadway Protection Project

Friday, November 19, 2010

Rickenbacker Causeway Shoreline and Roadway Protection Project

Miami-Dade County Public Works Department (PWD) has completed the Beach Re-nourishment and Improvement Project on the south side of Hobie Island also known as Windsurfer Beach and Virginia Key (Hobie Cat Beach). This project included three (3) components: 1) shoreline stabilization; 2) stormwater management and parking improvements; 3) exotic vegetation removal and landscaping of upland area. The construction sequence of this project was: First, removal of the exotic and invasive vegetation. Second, re-nourish and stabilize the shoreline. Third, improve the parking areas along with a stormwater collection system and finally landscape the upland with native species. This project cost \$6.8 million. This environmental project is the first of its kind being undertaken by PWD.
